Develop a GUI which accepts the information regarding the marks for all the subjects of a student in the examination. Display the result for a student in a separate window.

StudentResult.java

```
import javax.swing.*;

import java.awt.*;

import java.awt.event.*;

public class StudentResult implements ActionListener {

    JFrame f;

    JTextField t1, t2, t3;

    JButton b;

    StudentResult() {

        f = new JFrame("Student Result");

        f.setSize(300, 250);

        f.setLayout(new FlowLayout());

        f.add(new JLabel("Subject 1 Marks"));

        t1 = new JTextField(10);

        f.add(t1);

        f.add(new JLabel("Subject 2 Marks"));

        t2 = new JTextField(10);

        f.add(t2);

        f.add(new JLabel("Subject 3 Marks"));

        t3 = new JTextField(10);

        f.add(t3);
```

```
        b = new JButton("Show Result");
        b.addActionListener(this);
        f.add(b);

        f.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
        f.setVisible(true);
    }

    public void actionPerformed(ActionEvent e) {

        int m1 = Integer.parseInt(t1.getText());
        int m2 = Integer.parseInt(t2.getText());
        int m3 = Integer.parseInt(t3.getText());

        int total = m1 + m2 + m3;
        double per = total / 3.0;

        JOptionPane.showMessageDialog(f,
                "Total = " + total +
                "\nPercentage = " + per);
    }

    public static void main(String[] args) {

        new StudentResult();
    }
}
```

Step 2: Compile Program

Type:

javac StudentResult.java

Press Enter.

If no errors come, compilation successful.

Step 3: Run Program

Type:

java StudentResult
